TSUBAKI KABELSCHLEPP

# TOTALTRAX® COMPLETE SYSTEMS

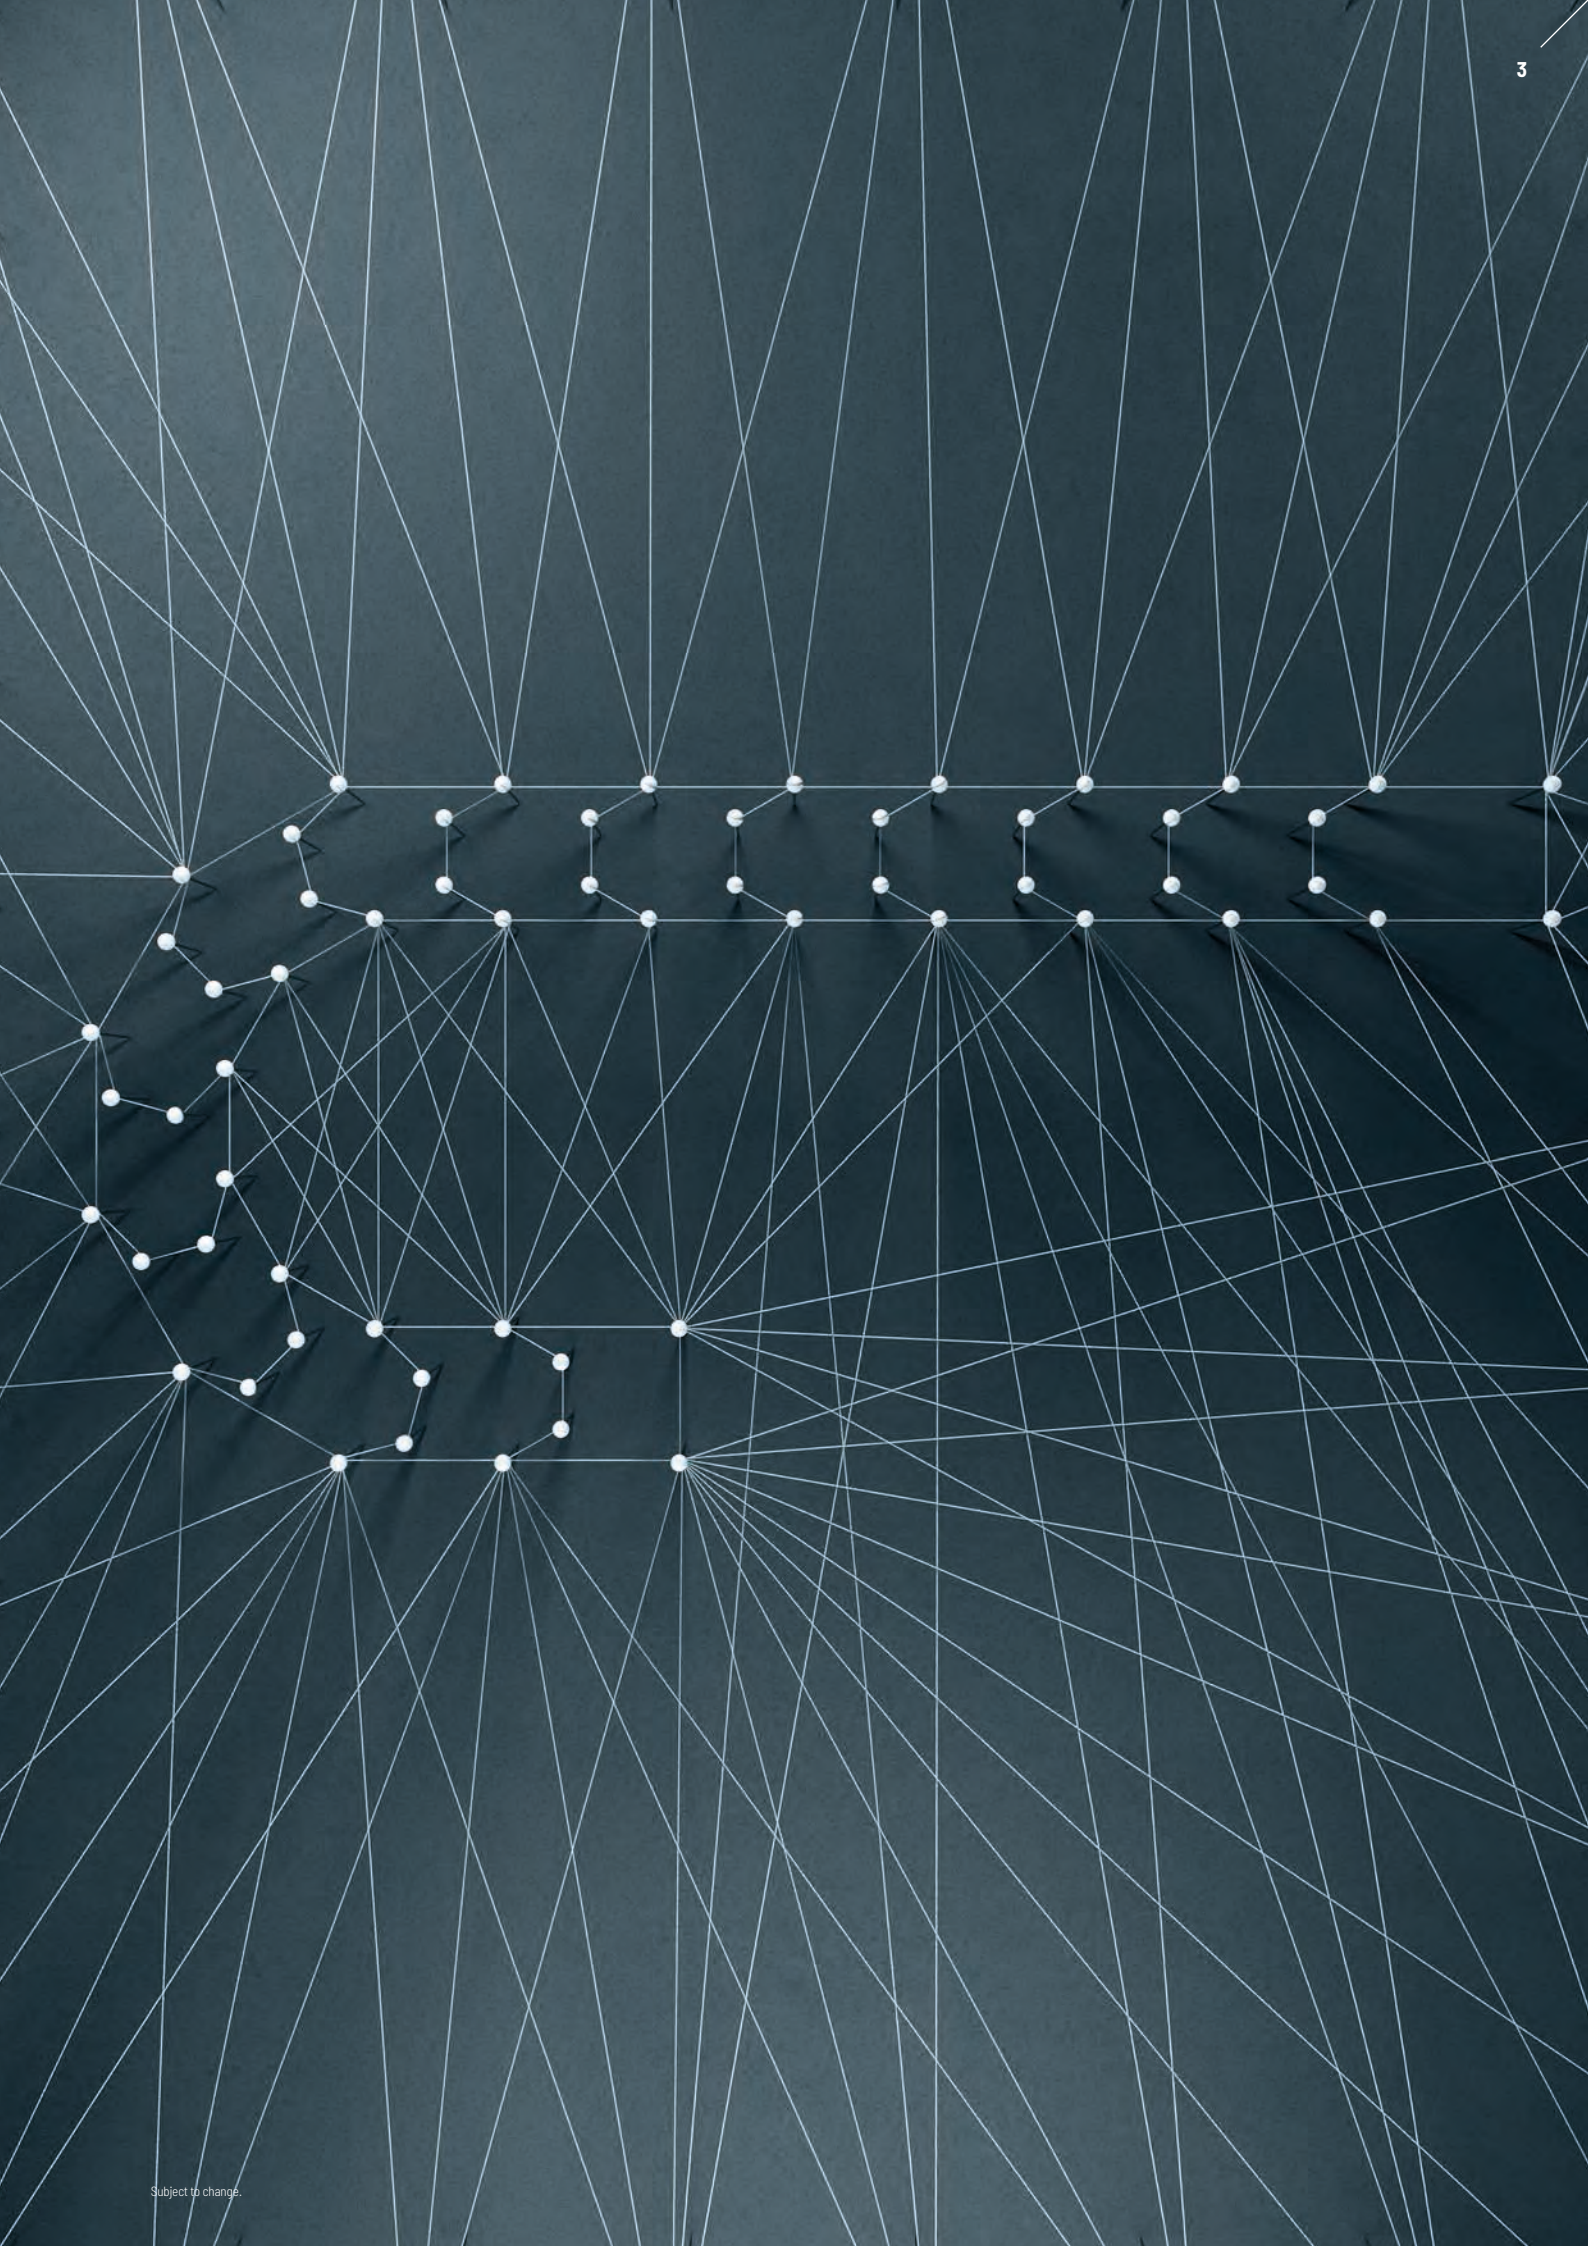

Fully harnessed  
and ready to use

## **EFFICIENT WORKING WITH INDIVIDUAL TOTALTRAX® COMPLETE SYSTEMS**

Do you require a ready-to-install cable carrier that is configured specially for your application, with all components perfectly coordinated?

We can help: Our TOTALTRAX® complete systems are as individual as the machines in which they are used, because they are configured to customer specifications. The focus here is always on customer service. You communicate your requirements to us, and we do the rest. In conjunction with our longstanding experience with high-quality components, this results in a customized, ready-to-install TOTALTRAX® complete system that will support the success of your application.

# THE STORY OF OUR SUCCESS

## A CONVINCING SOLUTION CATCHES ON

As a specialist for cable carriers, TSUBAKI KABELSCHLEPP has also been a reliable partner for many decades when it comes to complete turnkey systems. Thousands of TOTALTRAX® systems are in use worldwide. Over the years, the complete systems have entered a whole new range of applications. Beyond the typical applications for machine tools, they have also proven successful in areas such as steel works, railway engineering and the textile industry. Almost any industry or application benefit from TOTALTRAX® – from milking machines and 3D printers to workshop cranes. With over 65 years of application experience, design engineering competence and the right products for virtually any area of application, we offer solutions that provide customers with true added value.

### The following applies to all systems:

- » Manufactured from high-quality components
- » Perfectly coordinated components
- » Optimized turnaround times
- » Just-in-time deliveries
- » Complete systems from simple to complex
- » Installation and harnessing in Germany

## YOUR REQUEST IS OUR TASK

Which benefits will you specifically receive when you order a TOTALTRAX® system? Well, firstly, you will receive everything from a single source – from customized components and individual design to the delivery of the complete system. On request, we can also handle the installation. For you, this means: The workload of your staff will be reduced, you can save manpower, time and costs. Other advantages include optimized turnaround times, no storage costs, reduced effort at goods receipt, on-time delivery directly to the production location and short downtimes thanks to efficient plug-and-play installation. For larger orders, we even set up customer-specific production lines, but can also manufacture individual solutions from batch sizes of just one.

### **We support you with:**

- » Extensive consulting during planning
- » Support for project planning
- » Engineering for precision-fit interfaces
- » Customized system based on customer requirements
- » Procurement of all components
- » Professional support during the entire project

# THE PATH TO YOUR TOTALTRAX® SYSTEM

Did you know that we offer ready-to-install pre-assembled cables as per OEM standard? These can be bus cables or signal and power cables. 500 cables types are always available from stock. Custom harnessing is also possible. Purchase your complete systems incl. warranty easily from a single source. We only need to know a few things to plan your custom TOTALTRAX® system. In the first step, for example, we will ask you how much installation space is available and which cables and hoses have to be installed in the cable carrier. The desired harnessing of the cables and hoses are also important here. Drawings of the mechanical components are helpful so we can adapt the complete system to the situation at hand. You will be assigned a technical and commercial contact who will be advising you throughout the complete process – from project planning and engineering of precision-fit interfaces to the selection and procurement of all individual parts and purchased parts. Constant checks – from individual components to fully configured assemblies – ensure consistently high quality of the cable carrier systems.

# TOTALTRAX® FLEXIBILITY WITH A MODULAR SYSTEM

You determine what goes into your complete system. To give you a basis for decision making, we have divided the TOTALTRAX® systems into different categories. Can't find what you need?  
No problem – just get in touch.

## Basic

- » Cable carrier, opt. steel cable carrier
- » Cables & hoses without connectors and fittings

## Standard

- » Cable carrier, opt. steel cable carrier
- » Cables & hoses with connectors and fittings
- » Mechanical assemblies

## Standard Plus

- » Cable carrier, opt. steel cable carrier
- » Cables & hoses with connectors and fittings
- » Mechanical assemblies
- » Transport frame

## TOTALTRAX® without cable carrier

- » Cables & hoses with or without connectors and fittings
- » Mechanical assemblies
- » Transport frame
